

The background of the advertisement features several spools of thread in various colors (red, blue, green, orange, yellow) arranged in a dynamic, overlapping pattern. The spools are rendered with a fine, grid-like texture, giving them a three-dimensional appearance.

F&F's[®]
THREAD

The right sheen
The right color
The right quality

Polyester

The right thread for the job

Notice

No environmentally harmful products or carcinogens such as formaldehyde, azo dye stuffs are utilized in the production of our products. FuFu's Polyester embroidery threads fulfill the requirements of Oeko-Tex Standard 100 class 1.

Please store the threads in a cool and dry environment; avoid high temperature and humidity areas. After each usage, threads should be put in a covered container to prevent damp and dust.

The embroidered articles should be dried immediately after washing. Please do not fold or stack the embroidered articles when wet.

When ironing the embroidered articles, please use a low temperature setting. Cover the article with a clean towel and iron it lightly from the back side.

Color codes are common between different specifications of our products. Please note that even though two threads of different specifications may share the same color code, color differences may occur depending on the differences of raw yarn specifications, dye stuffs, and twists. Please take this into consideration when selecting between different specifications of our products.

It is recommended that threads of the same lot number be used for one assortment of embroidery, especially for symmetrical or combination designs.

FuFu's Polyester embroidery threads are manufactured under high level quality control standards. Our products possess high sheen, high tensile strength and color fastness that result in excellent production.

However, since we have no control over washing, dry cleaning, pressing, post-embroidery process, and the quality of other embroidery accessories; and since the value of the thread is so disproportional to the value of the material into which it is sewn, we are not and cannot be held responsible for any damage that could occur during the embroiderer's production.

We suggest that before going into mass production, the embroiderer assure himself first, by preliminary testing, that the dye fastness and the overall quality of FuFu's thread is suitable for his intended use.

If there are any special demands on custom dyeing and OEM yarn twisting, or any question about our products and services, please contact our office.

AVISO IMPORTANTE

En la fabricación de nuestros productos no se utilizaron productos que afecten el medio ambiente, ni cancerígenos como los formaldehidos, ni productos colorantes aso. Los hilos de bordar de FuFu's cumplen todos los requisitos exigidos por Oeko-Tex Standard 100 clase 1.

Por favor mantenga los hilos en un ambiente fresco y seco; evite áreas con altas temperaturas y humedad. Después de cada uso, los hilos deben colocarse en un empaque cubierto para prevenir la humedad y el polvo.

Los artículos bordados deben secarse justo después del lavado. Por favor no doble o apile los artículos bordados mientras estén húmedos.

Cuando planche los artículos bordados, por favor use un ajuste de baja temperatura. Cubra el artículo con una toalla limpia y plánelo suavemente por el revés.

Los códigos de color son comunes entre diferentes especificaciones de nuestros productos. Por favor tenga en cuenta que aunque dos hilos con diferentes especificaciones pueden compartir el mismo código de color, pueden presentarse diferencias de color dependiendo del material de la hilaza, colorantes y torsiones. Por favor tenga esto en consideración cuando seleccione entre las diferentes especificaciones de nuestros productos.

Se recomienda utilizar hilos del mismo número de lote para un surtido de bordados, especialmente para diseños simétricos o combinaciones.

Los hilos para bordar de Poliéster FuFu's están fabricados bajo altos estándares de control de calidad. Nuestros productos poseen alto brillo, gran Resistencia a la tracción y firmeza en el color como resultado de una excelente producción.

Sin embargo, ya que no tenemos el control sobre el lavado, lavado en seco, prensado y demás procesos después del bordado ni sobre la calidad de algunos otros accesorios para bordado; y considerando que el valor del hilo es tan desproporcional al valor del material con el cual será cosido, nosotros no somos responsables ni podemos ser responsables de cualquier daño que pueda ocurrir durante la producción del bordado.

Sugerimos que antes de iniciar una producción en serie, el operario de bordado se asegure primero de hacer las pruebas preliminares en cuanto a firmeza del color y en general a que la calidad de los hilos FuFu's sea la adecuada para verificar que se ajustan a sus requerimientos.

Si hay alguna solicitud especial en cuanto a teñidos personalizados y sobre la torsión del hilo OEM, o cualquier otra pregunta acerca de nuestros productos y servicios, por favor contacte nuestra oficina.

注意事項

本公司所製造的聚酯刺繡線，均不含福馬林及偶氮成份等致癌的化學物質，且已通過環保紡織100測試第一級產品的標準。

繡線請放置於乾燥通風之處，請勿放置在高溫潮溼之處；使用剩餘之繡線，請放入繡線紙箱內，並關上紙蓋，以免受潮、受塵而損壞品質。

刺繡成品在洗滌之後，請儘快脫水及晾乾，請勿將浸濕的刺繡成品折疊或多件重疊。

使用熨斗時，溫度請勿過高；將要熨的物品夾入乾淨的毛巾內，由背面輕熨。

本公司的各類產品，雖然色號相同，但顏色會因原紗規格、染料、撚度的不同而有所差別，請在企劃選用時，特別注意。

在完成同一商品時，請儘量使用製造日期相同的繡線，尤其是有左右對稱或組合情形時。

本公司的聚酯刺繡線，依高標準進行製造及品質管理，具備拉力佳，色牢度穩定，色澤光亮等優點。由於本公司無法掌控刺繡成品的水洗、乾洗、整燙等後處理過程，及刺繡成品或刺繡過程中需附加的副料之成份，也由於刺繡線本身的價值並不相等於刺繡成品的價值，因此，請刺繡廠商在使用本公司產品前先做測試，或與本公司確認產品品質是否符合要求。若未進行上述程序，而發生刺繡成品損害之情形，本公司不負賠償之責任。

若有特殊規格之需要，或對本公司的產品及代工事項有不明瞭之處，歡迎直接洽詢本公司營業部。

本公司通過ISO 9001驗證 ISO 9001 certified by SGS
